

Incorporating NYSSLS using New Visions in Earth Science

For teachers who are interested in jumping in to implementing NYSSLS in their classrooms but aren't sure where to start or are feeling overwhelmed when looking at the NYSSLS documents.

Unit 1 "Origins of the Universe" from the New Visions Curriculum will be used as a model of implementing the NYSSLS shifts. Each 5E lesson plan as well as the anchoring phenomenon and performance task will be explored in depth while modeling the student learning routines and teaching strategies found within the curriculum. You will leave ready to use these ideas in your classroom while still preparing for the Regents Exam in June.

When: October 15, 17, 22, 24
5:00 pm - 8:00 pm
Food and beverages available at 4:30.

Where: SUNY Buffalo State

Who: These minicourses are open to all teachers teaching Earth Science and administrators.

Cost: There is no cost to attend this workshop.

CTLE: All participants will earn 12 hours of CTLE professional development
